

Some users receive the error, *Column tdi\_imp\_st\_delete\_completed' does not belong to table Table1*, when running a Provider Data Import in build 876.

[Here](#) is the cw\_events error message.

DTUpdate 88.7 may need to be run in order to resolve this error.

To run update 88.7 follow these steps:

Create a backup of your data before applying any database update by following the instructions [here](#). To update the import settings run the DTUpdate 88.7 using the CW Admin utility.

The CW Admin Utility is located by default at: C:\Program Files (x86)\CAREWare\RW CAREWare Business Tier.

1. Right click *CW Admin*
2. Click *Run as Administrator*
3. Click *Stop Server*
4. Click *Common Storage Settings*
5. Click the box in the row for DataTierVersion in the column cmm\_st\_number
6. Change the value to 88.6
7. Click any other box to save the change
8. Click *Server Settings*
9. Click *Start Server*
