

How to start, stop, and restart the SQL Server service

Restart using local services:

1. Type Service in the search field.
2. Click Services
3. Scroll to SQL Server (CAREWare). (CAREWare is the default name, this may have changed by the user installing the database instance.)
4. Right click SQL Server (CAREWare).
5. Click Start.

- Click *Stop* to stop the SQL Server database instance service.
- Click *Restart* the restart the SQL Server database instance service.
