New labs, screenings, and screening labs can be added to CAREWare using the Clinical Encounter Setup. If a lab, screening, or screening lab is the equivalent of an RSR clinical test, that test's results can be included in RSR and ADR report results by selecting the equivalent HRSA-defined test from the Test Name for HRSA reporting list.

The following instructions are an example of adding a new screening lab and including the results of that screening lab in HRSA reports.

Main Menu				
Department of Health and Human Services	Add Client	System Messages		
	<u>Find</u> Client			
	<u>R</u> eports	25 Administrative alarms.		
	<u>D</u> rug Inventory System	3 unread user messages.		
	Appointments			
	Or <u>d</u> ers	About CAREWare		
	Administrative Options	Refresh Messages		
	<u>M</u> y Settings			
	Rapid Service Entry			
	Log Off			
	Exit			

1.Click Administrative Options.

2.Click Clinical Encounter Setup.

3.Click Screening Lab Setup.
