

CAREWare has an option to export data to a database in the CAREWare SQL Server database instance. In build 945, some users encountered an error message when exporting to SQL.

The error message was:

Source: jProgBusiness - Invalid column name 'cln_pde_processed'.

To resolve this error:

1. Go to *C:\Program Files (x86)\CAREWare\RW CAREWare Business Tier*.
2. Right click *CW Admin*.
3. Click *Run as Administrator*.
4. Click *Stop Server*.
5. Click *Common Storage Settings*.
6. Click *cmm_st_pk* to set the list in alphabetical order.
7. Scroll to *SQLPDIVersion*.
8. Change the value in *cmm_st_number* to 7.
9. Click a blank field to save.
10. Click *Server Settings*.
11. Click *Start Server*.
