Client data can be exported in several file formats using the *Single Performance Measure Client List*. The Custom Report option includes *Field Selections*, which can be selected to determine the data that will be exported. The performance measure functions as the filter determining which clients will be included in the custom report.

- 1. Click Administrative Options.
- 2. Click Performance Measures.
- 3. Click the performance measure to highlight it.
- 4. Check the box next to the provider domain.
- 5. Click Single Performance Measure Client List.

from List To	Custom Report Field Selection					

The custom report field selection options are from the *Demographics report* type. Click <u>here</u> to review the field selection options for a *Demographics report* type custom report. To add field selections click *Add Field* or if there are *Demographics report* type templates created, click *Templates*. Click <u>here</u> for instructions for creating templates.

- 1. Click Add Field.
- 2. Type the name of the field or a search term in the search field at the top.
- 3. Click the field selection to highlight it.
- 4. Click Select/Use Field.
- 5. Click Save.
- 6. Once all field selections have been saved, click Close.
- 7. Click Make Client List.
