

As of build 934, CAREWare has a new feature, *Linking Medications to Service Records*. Once the *Use Subservice Medication Trigger* option is turned on, adding a subservice with *Trigger medication prompt upon entry* activated displays *Related Medications* and a *View/Edit* button for users to enter medication records to link to that service. If no medication is linked to the service, that service record will be red in the client's services list. If a medication is linked to the service, the medication record will be green.

To activate *Linking Medications to Service Records*:

1. Go to C:\Program Files (x86)\CAREWare\RW CAREWare Business Tier.
2. Click *Stop Server*.
3. Click *Common Storage Settings*.
4. Click *cmm_st_pk* to set the list in alphabetical order.
5. Scroll to *UseSubserviceMedication Trigger*.
6. Change the value for *cmm_st_number* from '0' to '1'.
7. Click another space to save the change.
8. Click *Server Settings*.
9. Click *Start Server*.

Add Subservice Edit Subservice Delete Subservice List Contracts for Subservice

Once the trigger setting is enabled that subservice will have the option to add medications to a list of medications related to the subservice when a new service is added to a client's record.

1. Click *Find Client*.
2. Enter search criteria.
3. Click *Search*.
4. Click the client record.
5. Click *Details*.
6. Click *Service*.
7. Click *New Service*.
8. Click *View/Edit for Related Medications*.

Date:	Service Name:	Contract:	Units	Price:	Cost:
9/8/2017	Tags Dental Care (Dental Services)	First Contract	1	\$0.01	\$0.01
Service Provided By	Start Time	End Time	<input type="checkbox"/> 12-step self-help	ARV Adherence Assessment	Attachment
Gredlewist, Folsbogen					
Related Medication: View/Edit					
<input type="button" value="Amount Received"/> <input type="button" value="Save"/> <input type="button" value="Cancel"/> <input type="button" value="Print"/>					

9. Click *Start*.
10. Check a medication or regimen.
11. Click *Next*.
12. Complete medication form.
13. Click *Finish*.
14. Click *Close*.

The medication will appear in the client's medication list. The medication will be listed as a *Related Medication*.

Related Medication:	View/Edit
amoxicillin (Capsules)	
<input type="button" value="Amount Received"/> <input type="button" value="Save"/> <input type="button" value="Cancel"/> <input type="button" value="Print"/>	

To unlink that medication from a subservice:

1. Click *View/Edit* for *Related Medication*.
2. Click the linked medication.
3. Click *Link/Unlink Service*.
